I have more than 30 years of enterprise technology leadership, architecture, product and business experience from Startup through Global enterprise. Started with software products such as commercial databases, streaming media servers and on to SaaS/ PaaS services. Extensive experience with domestic, DOD and international regulatory requirements.

I have 14+ years of Cloud experience, 9 years experience in the financial sector and more than 2 years in the payment sector. I have a particular focus on CyberSecurity and resilience.

I have extensive experience in domestic, Federal/DOD(Fedramp), STIG, SOC, GDPR and international regulatory requirements.
Experience in the financial sector, Pharma, insurance, Federal/DOD (Fedramp) as well as media (stream/IPTV, advertising, travel, ecommerce and more. I have built several high volume ecommerce sites with peak volumes of 17M transactional users.

I have built two of the most successful ad serving platforms: starting with DoubleClick - subsequently acquired by Google as their ad serving platform and a search engine acquired by Microsoft. I have built B2C, B2B, SaaS and PaaS products/platforms. In recent years my focus has been on the "buy side of things".

My experience includes large global platforms, on premise, colocation data center builds and more recently migration and transformation of existing environments and legacy systems to cloud as well as green field cloud native architecture, streaming platforms such as Kafka and NAT, event driven and Serverless architecture.

Federal implementations of global PolyCloud fabrics (cross cloud) with disconnected state support for on-premise hybrid cloud.

8 Companies that I have built or restructured have gone public or been acquired based on my IP.
